

COAL FIND

The Lands Selected By
the Great Northern at
Nett Lake.

An Eastern Company Has
Secured Two Thousand
Acres Near There.

Large Number of Explorers
Will Go Out in the
Spring.

Tower, Minn., Feb. 12.—(Special to The Herald.)—As the scattered finds about coal in Minnesota are collected and woven into one, it becomes more apparent every day that there is a great deal more to the Great Northern's selection of land near the Nett Lake Indian reservation than the parties interested are willing to admit. For the lands which the railroad company is entitled to in lieu of portions of its grant in this and other states, it has received a statement from a number of locations in that vicinity, among them the Little Pigeon mine. Many of the mining properties on the Vermilion have been taken by the Great Northern, and the latter is naturally desirous to get under its feet as much of the coal as it can. It is estimated that the Nett Lake area contains a number of coal fields of varying thickness from a few feet to over 100 feet. Owing to a lack of capital and the long distances from the Canadian Pacific railroad, the owners did nothing further with the property, but the result of their work was a great revelation to the coal fields on the American side as showing the favorable geological conditions.

In an interview a few days ago with a gentleman representing Eastern investors, who has been in the Nett Lake area for several years, he informed me that explorations are being made at several points to the distance of the ledge from the surface. In most places the ledge is laid with from thirty to 100 feet of clay, covered with eighteen inches of black loam. Aside from its mineral and timber resources, the valley is destined to become one of the most prosperous agricultural sections of Minnesota. Several places, however, there are outcroppings of the ledge, showing two or three inches of coal and from six to ten inches of bituminous shale, covered by clays.

An expert was sent to examine the formation and compare it with that of the best bituminous district in Ohio. He expressed his opinion that the two were practically identical. The coal is suitable for cooking purposes, which is an important consideration in view of its proximity to the Great Northern. The Great Northern had explored the field in the fall of the year 1894, and had said to have received a favorable opinion from a noted geologist, but this is naturally denied. The Eastern company, represented by my informant has secured 2000 acres of land and has no further object in keeping the matter quiet. Inquiries about the find are being made from all parts of the Northwest, and a number of the people will start in the spring.

The distance by the present winter route is over eighty miles, but in summer steamers carry passengers from Tower to the west end of Lake Vermilion, from whence a four-mile portage leads to the Little Pigeon, and the remainder of the distance can be made by canoe, and it is a pleasant trip.

Wife—Here's an account of a man who shot himself rather than admit a case of indigestion. Husband—The fool! Why didn't he take Dr. Williams' Little Early Risers? I used to suffer just as he did before I commenced taking these little pills. S. F. Boyce.

Suffered Eighteen Years.
Pains Departed and Sleep Came.

Mrs. Julia A. Brown, of Covington, Tenn., whose husband has charge of the electric light plant at this place, has been a sufferer. Her ailments and speedy cure are best described by herself, as follows:

For 18 years I suffered from nervousness and indigestion. I tried every remedy recommended by family and friends, but I could get no relief. I was as well as a wreck, being treated by three local physicians, Drs. Barrett, Mackey and Thord, they

informed me that I had a nervous prostration, and that there was little hope for me. I then decided to try Dr. Miles' Restorative Nervine.

I was then unable to get to sleep until well on toward daylight, and during all this time I had a deep, heavy pain in my left side. I was most miserable, indeed, but after taking one bottle of the Nervine, I could sleep all night just as well as I ever did. The Nervine is the only remedy that gave me any relief whatever.

Myself and I thank God every day of my life for Dr. Miles' Restorative Nervine.

The purpose of advertising being to make sales the advertiser is naturally prejudiced. He may not tell the exact truth, he may not tell what is false. But full credit should be given to any disinterested, unprejudiced outsider. When the "outsider" is a famous author, editor, preacher and humanitarian like Dr. Edward Everett Hale it is a duty and a pleasure to accept the statement made and, if read by, act upon it. These things being so, please read and consider the following letter, from the editorial rooms of the Boston Commonwealth, 129 Tremont street, Dec. 23, 1895.

"I have been much interested in the idea that in Africa, where the Kola or Kola nut grows, the natives eat the fresh nuts to prevent hunger, thirst and exhaustion. For some time the medical profession has given Kola much attention because of its medicinal qualities, but heretofore the difficulty has been in getting the fresh nut in an available preparation so as to retain the medicinal properties. This difficulty is now overcome by that remarkable establishment, the Eureka Chemical and Manufacturing company, of La Crosse, Wis., which has put upon the market a very efficient and easily absorbed preparation. I am assured by a careful inquiry among leading physicians and personal friends, who have used it, that Dr. Charles's Kola Nutrine Tablets are invaluable in insomnia and all nervous diseases. SAN FRANCISCO'S SCORE.

A Tough Stranger Who Murders Tougher Women.

San Francisco, Feb. 12.—The police are inclined to believe that there is a stranger in this city whose mania is to equal, or possibly eclipse, the record of London's notorious Jack the Ripper, who within the course of a year or two murdered many fallen women. It seems as though such were the case, for within the past few days a young girl on Market street has been strangled to death by an unknown assassin, and several other women in the same vicinity have been beaten, stabbed and strangled. In each of the latter cases, the offender escaped without leaving a trace by which he could be detected.

On the night of the murder of "Lulu" May Smith, a man bearing the appearance of a fugitive entered the room of a hotel, who had assumed the name of Lulu May, on Market street. After inquiring as to the amount of money the girl had, and receiving a reply favorable to him, he became exceedingly rough, tearing the girl's clothes from her person in an endeavor, it is presumed, to reach the girl's chest. He then ordered her to get up, and she, in an endeavor to escape, was seized by the neck of the neck, and he threatened to call the police, and the attention of the girl in room adjoining hers and he made a hasty exit.

TIBURAN ISLAND.

Bradbury's Quest For Treasures of Montezuma.

Los Angeles, Cal., Feb. 12.—Col. John Bradbury, who is at present in Mexico, has written to some friends in this city outlining his plans for exploring Tiburan Island, situated in the Gulf of California. The adventures that he has purchased the right to explore the island, and has armed her with a Maxim gun and a five-inch rifle. From his home in Mexico he has recruited a band of men, who are experienced fighters and accustomed to Indian warfare. The latter further stated the real object of the expedition was to find a number of the people who start in the spring.

The distance by the present winter route is over eighty miles, but in summer steamers carry passengers from Tower to the west end of Lake Vermilion, from whence a four-mile portage leads to the Little Pigeon, and the remainder of the distance can be made by canoe, and it is a pleasant trip.

Venezuelan Question Re-
garded as Being Practically
Settled By This Move

New York, Feb. 12.—A special dispatch to the Herald from London says that an important announcement in the opening day's proceedings in parliament was made by Lord Salisbury respecting the Venezuelan affairs. This was an explicit statement that direct negotiations with Venezuela would soon be resumed, and the great obstacle to a settlement of the question be removed thereby. By the Venezuelan passage in the House of Commons, the Venezuelan question was practically settled, and the House of Lords, which had been in session since the morning, was adjourned until tomorrow.

THE Indian has given to his "pale face" and weaker brothers, the greatest boon of modern civilization, nature's own medicine, Kikapo Indian Remedies made from roots, herbs, gums and barks, just the same as the Indians have used them for centuries. Their wonderful physique, power of endurance, and ability to resist disease are evidence of the efficacy of these remarkable preparations. On the arrival of the first settlers in this country, the Indians did not endeavor to hide their knowledge, but went among them

and taught them the use of simple, but powerful remedies. And the cure of all diseases. It was the first step toward the modern science of medicine. From that time to the present, the knowledge of these cures have been passed down from generation to generation. The great secrets of health and life are now being handed down to the world. TRUST REORGANIZATION.

Plan Completed For Reorgan-
izing the Whisky Trust.

New York, Feb. 12.—A local paper says: Richard B. Hartshorn, John I. Waterbury, Frederick M. Lockwood, Julius S. Bache and William E. Hutton, appointed to reorganize the Distilling and Cattle Feeding company, have completed their plan. In the progress of reorganization it was suggested to the committee that the new corporation should control the distilling of its products through a distributing company. The successor company, the American Spirits company, offered its stockholders or holders of whisky trust certificates to subscribe, at par, for the first preferred stock of the Spirits distributing company, which was organized under the New Jersey laws, with a capital of \$7,500,000, of which \$2,500,000 is first preferred capital, 7 per cent stock, and \$5,000,000 of second preferred non-cumulative, 6 per cent stock, and \$3,750,000 common stock. The plan of the distilling company is intended to effect a large saving for the distilling company over the methods employed and result in large net profits for the distributing company. The entire subscription of \$2,500,000 has been underwritten by a syndicate of bankers.

WINNIPEG BONSPIEL.

MacLeod's Duluth Rink De-
feated Gill Yesterday.

Winnipeg, Feb. 12.—The big Manitoba curling bonspiel is in full swing, about fifty games being played off yesterday in the grand challenge and Walkerville events. There are still many good rinks in the race. The competitors have been held back to accommodate the curlers from over the line. Scuttleton, of St. Paul, and MacLeod, of Duluth, arrived yesterday afternoon and both played games last night. Scuttleton was pitted against Cameron, of the Winnipeg Granite Club, and MacLeod was pitted against Thistle, in the Walkerville draw, and will play tomorrow. MacLeod plays Payne, of the Winnipeg Thistles, in the grand challenge event. There is a large attendance of curlers and the success of the bonspiel is assured.

THE FACTOR OF SUPREMACY.
It is stated that an investigation has recently been made into the conditions of the German and Belgian iron and steel industries, which conveys an important lesson to this country. The investigating committee consisted of seven employees in the British iron industry, and seven representative workmen, acting together to find the reasons why the German and Belgian works are able to compete successfully with the British works in neutral markets. The report of the investigation, recently issued, declares that while wages in Belgium are lower than in England, the difference in the case of Germany is unimportant. It states that the wages cost of production is admittedly higher in England, but says that this is largely accounted for by the difference in methods and machinery.

The real advantage of the Belgian and German works, the report says, lies in transportation charges. The continental charges are generally one-half the rates for long distances in England. The Belgians can send their iron 100 miles by rail, to Antwerp, and thence to London by sea at less than is charged from St. Louis to London. Not only have continental manufacturers cheaper transportation from their works to the point of export; they have also cheaper freight by steamer to foreign markets, even including the British colonies. It should also be recognized that the continental waterways exercise a powerful influence not only by their transportation of raw materials for iron manufacture, but by their influence on railway rates.

Commenting upon the conclusions reached in the report of the investigation, the Pittsburgh Dispatch says: "This declaration by the highest practical authority re-enforces what the Dispatch has often said, that transportation is the key to industrial success, especially in the iron and steel business. The English have lost their supremacy through exclusive reliance on railway transportation and the supremacy of railroad combinations. It remains to be seen whether the United States, and especially Pittsburgh, will permit the lesson to pass unheeded. The conclusion of the report in question is that if English manufacturers enjoyed the same railway rates and royalties as those paid on the continent, foreign competition could be defied in neutral markets." The adaptation of that to the local interest is that if we secure adequate water transportation between

the coal and the ore, and water routes to the ocean either by the lakes or down the rivers, the manufacturing districts from the lake shore to the West Virginia mountains can defy foreign competition in almost any market.

Water transportation is the important factor which should make Duluth the center of a great iron and steel industry. While it costs from 80 cents to \$1.50 per ton to transport iron ore from Duluth to Lake Erie ports, it costs but 30 cents, and sometimes less, to bring a ton of coal or coke from the same ports to Duluth. When the fact is considered, that it takes two tons of iron ore and only one ton of coke to make one ton of Bessemer pig iron, the great advantage which Duluth possesses can be seen at a glance.

When transportation is one of the great factors of supremacy, and there is no point in the country in favor of which it operates more strongly than it does in Duluth's case.

ABRAHAM LINCOLN.
Next to the name of George Washington in fame and honor among the American people stands the name of Abraham Lincoln. This is the anniversary of his birthday and in many states of the Union the people have paused from their business to do honor to the memory of the nation's martyred hero. It has been well said that the measure of Washington's fame is full, but for centuries to come, and over vast spaces of the globe, the character of Abraham Lincoln will unfold, revealing more and more the blended beauty, beneficence and power of that marvelous sagacity, genuine humility, unaffected candor and abounding charity and humanity which made him the fit and favored hero of the world's greatest political drama; the liberator of a race, the savior of a nation, the martyred apostle of human freedom.

The character of the man is well revealed by an extract from his famous oration at Gettysburg. He said: "Four score and seven years ago our forefathers brought forth on this continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal. Now we are engaged in a great civil war testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field as a final resting place for those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this. But in a larger sense, we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our poor power to add or detract. The world will little note, nor long remember what we say here, but it can never forget what they did here. It is for us the living rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be dedicated to the great task remaining before us—that from these honored dead, we take increased devotion to that cause for which they gave the last full measure of devotion—that we here highly resolve that these dead shall not have died in vain, that this nation, under God, shall have a new birth of freedom, and that government of the people, by the people, for the people, shall not perish from the earth."

THE RONTGEN DISCOVERY.
Today's dispatches bring to Herald readers two practical tests of the application of the cathode rays lately discovered by Professor Rontgen in Germany. One of these experiments is in progress at the Carnegie works, in Pittsburgh, and will develop the power of the "X rays," as the scientists will probably designate them, to penetrate armor plates, steel castings, etc., for the purpose of discovering whether any flaws exist.

The Chicago test has been already carried to a wonderful and successful termination as an aid to practical surgery. A man suffering from a pain in the palm of his hand had the afflicted member exposed for fifty-five minutes to the cathode or "X rays," and, upon the development of the receiving plate, a buxshot was discovered embedded between the metacarpal bones of the third and fourth fingers. The man was injured by a discharge of buxshot over two years ago, but the exact spot where the bullet was located was never known until yesterday's test was made. It will now be extracted without difficulty.

Edison, at Menlo Park, is also experimenting in photographing the brain of living human subjects, using the same rays, but as yet has not met with any great success. The possibilities of Professor Rontgen's discovery are already beginning to be felt as being of practical benefit to mankind.

IT IS A NECESSITY.
Naturally those who are interested in the private hospitals in Duluth are opposed to the idea of a county hospital being built. They adopt this attitude because the establishment of a county hospital would decrease the revenue of the private hospitals. Probably this would be the case, and it is not astonishing that there is opposition from that quarter.

But the opposition which comes from the private hospitals and their friends should not be permitted to defeat the idea of a county hospital. The large amount, which the county now pays annually to the private hospitals for county patients would be sufficient to more than

pay the running expenses of a county hospital. It is also true that the accommodations provided by the private hospitals are insufficient, whenever an epidemic occurs. The increasing population of the county will soon tax their accommodations even in times when there is no epidemic. There is another point in favor of a well equipped county hospital. The present private hospitals are not fireproof. One can but shudder at the thought of what would happen in those institutions should a fire gain much headway before being discovered.

A SHORT CANAL ROUTE.
In the Canadian senate on Monday, Senator Clifton advocated the construction by Canada of the Ottawa and Georgian bay canal. The project has been before Canada for forty years, the senator said, but had not been taken up for want of finances. The route has been surveyed and plans and specifications prepared many years ago and a contract for a part of the work was let. The project has again been taken up by leading capitalists, bankers and boards of trade. Last year a company was incorporated and is now pushing the enterprise upon the attention of the government. It will connect Montreal with the northern portion of Georgian bay and furnish a short and direct outlet for the cereals of the Northwest.

A glance at the map will show that the construction of the proposed canal would give a very short route from Duluth to the Atlantic ocean. From Georgian bay, French river could be utilized to its connection with Lake Nipissing, and the latter body of water is separated from the Ottawa river by less than fifty miles of land through which it would be necessary to cut a canal. It is said that there are no engineering difficulties in the way of constructing such a canal and it could be built at a moderate cost. It would be necessary to deepen French river and also the Ottawa river at some points, and then a very short route would be provided from ports on Lake Superior and Michigan to Montreal, from which point there are no obstacles to the passage of vessels by way of the great St. Lawrence river to the Atlantic ocean.

Ex-Senator John Day Smith, one of the leading Republicans of Minneapolis, has made an able address on the subject before the gold and silver club of that city on Monday evening. He made a strong argument in favor of free silver coinage. "Is it any wonder," he asked, "that England demands the single gold standard? Her motives are not difficult to fathom. England is today the heaviest creditor nation upon the earth. It is estimated that the rest of the world owes her \$10,000,000,000. If this government was in that condition, would it not afford the otherwise expensive luxury of a gold unit of value. It is agreed upon all sides that the free coinage of silver would be an excellent thing if it could be brought about by international agreement. This concession ought to give us the victory as it surely will in time."

Mayor Pinckney, of Detroit, said in Chicago the other day that "neither the thief nor the receiver could obtain a title to a horse stolen in the night; but he who grabs a franchise worth millions in broad daylight and in collusion with the city authorities has the title confirmed to him and his heirs and assigns forever." If that were all of it, it might be considered, says the Pittsburgh Dispatch, but when the whole picture is taken into account, the seizure carries with it the possession of the whole city government as the fixtures, messages and tenements common to the people with the property, it is time for the people to interpose a few mild objections.

The Long Prairie Leader gave currency to the report that Editor Eastman, of the St. Cloud Journal Press, and ex-Superintendent Lee, of the St. Cloud reformatory, each had congressional aspirations. Editor Eastman would be a candidate for the nomination of our Democratic brother of the Journal-Press has not the slightest wish to go to congress, and does not believe that Mr. Lee has any idea of being a candidate against Mr. Towne.

The Pittsburgh Dispatch of last Saturday celebrated the centennial of the birth of its editor by issuing a colorful forty-eight pages, including a handsome illustrated cover, which is a work of art. The edition contains all the latest news of the day and contains well-written sketches of the wonderful progress of Pittsburgh during the past fifty years. The Dispatch is a great newspaper, and its jubilee number is worthy of its enterprising spirit.

Congressman Perkins, chairman of the house committee on printing, has announced that hereafter he will object to the printing of undelivered speeches in the Congressional Record, as he holds that that publication should be what it purports to be, an actual report of the proceedings of the house. This is a move in the right direction, but it will be tough on members who cannot catch the speaker's eye.

The morning paper publishes what was news yesterday. The evening paper gives today's news today. Is it any wonder that the evening newspaper is the favorite?

The opening of the artificial waterway that will permit sailing vessels to pass through the Iron Gate of the Danube in Duluth. They were drawn on the International Bank of West Superior, and bore forged certificates, which made it easy to pass them. Well, this railroad man was caught on one of these, and it cost him \$20 for the road holds its employees responsible for any checks they may take.

The individual who worked the railroad man had been in the office before, and bought a ticket to St. Paul. This time he came in and asked for a rate for Y. M. C. A. members to go to Minneapolis and return. The railroad man was tickled at the idea of getting thirty passengers, and when the man went

an example of the work that is done by European governments in the extension of water transportation. The canal is built by the Hungarian government at a cost of \$9,000,000, to open the Danube for commercial purposes only.

Senator Clifton says he will be a candidate for president, because he cannot resist the pressure brought to bear by his friends. This is an old excuse, but there is really no reason why Senator Clifton should not aspire to the presidency. It is an honest ambition, and the Illinois senator is competent to fill the high office.

The Maryland supreme court has made an important decision. It holds that the purchaser of a section in a steaming car for a given trip has the right, if he cannot find the train before reaching his destination, to transfer the ticket to another first-class passenger for the balance of the trip for which it was sold.

The English journals are much surprised at the success of the United States loan. They entertained the idea that the British aid, just as they think that other nations could not romanticize silver without England's assent.

Miss Mary Williams, of St. Louis, prayed one week ago that the heavens would open and rain down whisky. But up to date the thirsty tramps in that city have waited in vain for the downpour, and they are getting ready to return to cheap beer.

Gen. Dillon, of Washington, has organized a society, whose mission will be to inculcate love of the Monroe doctrine. He might start with Editor Godkin, of New York. If he can infuse some Americanism into him, the society will be accounted a success.

Mr. Reed, of Maine, is speaker of the house of representatives. He is a man of Maine, is a president pro tem of the senate. The commanding position occupied by the Maine senators and representatives is due to their long service in congress.

It does not take the average newspaper reader long to discover which is the brightest, newest and most attractive newspaper. The increasing circulation of The Herald demonstrates this fact.

Senator Thurston wants to pension every colored person who was born in slavery. The Nebraska senator must have presidential aspirations or there must be a heavy colored vote in his state.

Mr. Gladstone is said to be enjoying perfect health and despite his advanced age he is engaged daily in literary work. Mr. Gladstone certainly does not intend to "rust out."

It is said that Mr. Cleveland's choice for president is Mr. Olney, and of all the members of the cabinet Mr. Olney is certainly the ablest.

Col. Dan Stuart's nerve appears to be in good working condition.

THE ROUNDER.
It is not always best to laugh at the man who falls down on the ice street, for you may fall yourself the next moment; neither is it wise to cast things at the man who is unfortunate enough to catch a bogus check, for the ways of the wicked are easy and smooth, and you may get caught yourself. There is a railroad man employed in the passenger department of one of the offices here who realizes that now if he never did before, The Rounder ought to give his name, but in charity will leave the curtain drawn.

The Fern Club Dance Last Evening Was a Great Success.

Ladies of the Maccabees Will Have Their Social Tomorrow Evening.

Knights of Pythias Ball Also to Be Given—Other News.

The ladies of the Fern club exceeded all expectations in the success of their ball at the Eastern hall last evening. About seventy-five couples were present, making the affair a financial as well as a social success. A number were present from Duluth, also from West Superior and other points. Music was furnished by Dr. Murphy's orchestra with R. L. Fisher, pianist. The members of the club, which consists of young ladies in their teens to be contrasted with the management of the series of dances already given. Several more will be given at the Eastern hall. The Knights of Pythias are exerting themselves to make their dance at the Eastern hall the same evening a brilliant affair, and indications are that they will be successful.

LINCOLN SERVICE.
An interesting Lincoln memorial service was held at the Eastern hall last evening. Speeches were made by Rev. L. P. Fisher, Col. E. C. Grady and Col. H. T. Smith. The service was held at the same place. The Sunday school children were also present and sang songs in honor of the great leader.

WEST LUTHER CHURCH.
The West Lutheran church is taking considerable interest in the service given by Bishop Fowler at the Lyceum in the near future for the benefit of Dr. Fisher.

MISS F. T. BURESH.
Miss F. T. Buresh has returned from Chicago, where she has been attending the funeral of her grandmother.

Grossly Exaggerated.
The story of the arrest of Charles Murray, published in the morning paper, is grossly exaggerated. The trouble is said to be in a misunderstanding between Murray and his employer, Joe Bloom. The former claims that his employer failed to pay him the wages he was entitled to, so he kept it out of his collections. The amount is small, and does not nearly approach \$25, as stated in the morning paper. William Campbell is wanted for making a false statement in connection with the case.

A Handsome Store.
Among the stores that line the city streets, offering to the public the very best in all lines, is the store of J. T. Anderson & Co., recently opened at No. 112 East Superior street. The store is a handsome one, and is well stocked with goods. The store is a handsome one, and is well stocked with goods.

Letter of Condolence.

At the meeting of the Duluth-Superior Merchant Tailors' exchange, on Wednesday evening the secretary was instructed to address a letter of condolence to J. S. Lane, who recently sustained the loss of his wife through typhoid fever, and the following has been sent him:

"J. S. Lane, president of Duluth-Superior Merchant Tailors' exchange: If any consolation can come to you under so heavy an affliction as you have experienced in the loss of your dear wife it must come from a higher power than ours, and your strong sense of religion and duty of resignation to the will of Him who directs all things for our good. Our tenderest sympathies go out to you, and we sincerely hope that both for your own and your child's sake you may find comfort and consolation in looking forward to that blessed meeting from which there will be no separation. May you be sustained in your affliction by the Father of all mercies, be our wish."

THE SALE

Bids For Howard & Haynie's Stock Were Opened This Morning.

Many Local and Outside Men Made Offers For the Goods.

John A. Storm Was the Highest Bidder, Amount \$22,050.

In response to an order from the district court, Monroe Nichols, assignee for Howard & Haynie, this morning conducted a sale of the Howard & Haynie stock and fixtures at 10 o'clock. The order of the court was issued Jan. 20, and the sale was called for this morning, directing sealed bids for stock, fixtures and lease in grain.

Before the hour arrived a little knot of prospective purchasers were gathered in the stock room, together with Monroe Nichols, the assignee, E. C. Howard, J. E. Haynie, John G. Howard and W. N. Draper, the attorney for the assignee.

The interest was as deep though the rush was not so great as during the half-price sale conducted just prior to the assignment, when the store was filled with a fighting, struggling mass of women, with a sprinkling of uncomfortable looking men, all looking for bargains of which there were plenty.

The stock was then tumbled and disarranged, and now it is carefully arranged and arrayed upon the shelves in a neat, orderly manner.

Practically at 10 o'clock Mr. Nichols notified all who had not put in bids to do so at once. Two sealed bids came in response to the call, and the number of bids then was eleven. There were bidders from St. Paul, Minneapolis, New York, Duluth, and other places, and as Assignee Nichols prepared to open the bids they all gathered about to hear them.

The goods offered comprised the stock in merchandise, a horse and delivery wagon and the store fixtures, all the assets except the accounts and bills receivable. The invoice value of the stock was \$34,207, the horse and wagon \$100, and the store fixtures \$500. The accounts receivable were estimated at \$400.

THE SEVERAL BIDS.
 The bids in the order of their size were as follows: John A. Storm, \$22,050 for the stock, fixtures and fixtures; Max Lowenthal, New York, \$10,000 for the stock, fixtures and fixtures; H. W. Rhodes, \$18,150 for the stock, fixtures and fixtures; D. M. Hodge, \$15,000 for the stock, fixtures and fixtures; P. T. Cavanaugh, St. Paul, \$13,100 for the stock and fixtures; C. W. Smith, Duluth, \$12,500 for the stock, fixtures and fixtures; D. A. Young, \$10,000 for the stock, fixtures and fixtures; Van Slyke, Young & Co., St. Paul, \$12,500 for the stock, fixtures and fixtures; Miller, Minneapolis, \$11,650 for the stock and fixtures.

None of the four highest bidders were present. For the stock, fixtures and lease, John A. Storm's bid of \$22,050 was the highest, and for the horse and wagon J. E. Smith and W. B. Phelps were tied at \$20.

The bidders were instructed to deposit cash checks for 10 per cent of their bids with Assignee Nichols this afternoon, and the identity of the successful bidder was left a mystery until then.

STORM DID NOT APPEAR.

Up to 2 o'clock only two certified checks have been turned into Assignee Nichols and the mystery was as deep as ever. The checks handed in were for D. M. Hodge, whose bid was fourth, and J. E. Smith, whose bid was next. Hodge was represented by W. B. Phelps, and he himself kept in the background for reasons of his own. His bid was the highest up to 2 o'clock, unless some of the three unknowns, Storm, Lowenthal or Rhodes, should appear later. At 2 o'clock Mr. Nichols left the store, remarking that if the bidders were coming they had had time to do so.

W. B. Phelps, representing H. B. Chaffin & Co. of New York, had looked over the stock, and it was expected that he would bid. No bid appeared from him, but it was said that J. E. Smith's bid was for him.

The awards will probably not be known before tomorrow.

NANSEN

Confirmation of His Safety
Reported From Archangel.

The News Creates Intense Interest in London.

Views of General Greeley and Others in Washington.

London, Feb. 15.—The British consul at Archangel, capital of the Russian government of that name, telegraphs confirming the report that Dr. Nansen is safe and returning from the North pole.

The news of Dr. Nansen's success has created intense interest in this city. The report received from Irkutsk was generally discredited at first, although more faith was placed in it than in the previous rumors, which have reached London during the past twelve months. The dispatch from the British consul at Archangel, given above, is regarded

as conclusively showing that the Norwegian explorer is homeward bound, even if he has not discovered the pole. Dispatches here from different parts of the continent indicate that the news is manifested throughout Europe, and it is generally credited at the European capitals, although even Dr. Nansen's wife and relatives do not believe the announcement that came through Kuchmaroff, the agent of Dr. Nansen near the mouth of the Lena river, residents of which he had just visited. Dr. Nansen's safety was sent by Kanderoff, the local Russian official in the Yakutsk region, who was a member of the Siberian-Koffs expedition.

Dr. Norden, who is in Christiania, is inclined to believe the news of Dr. Nansen's safety at any rate, even if it is not true that he has succeeded in discovering the North pole. According to the opinion of Arctic experts here, when the Fram left Kara sea in 1893, who may have found the sea northward free of ice and pushed on until she was locked in. They add that she may then be allowed to drift until the expedition came to land around the North pole and that Dr. Nansen and his party may have returned in ships to the Siberian islands.

At the Siberian islands it is believed Dr. Nansen and his companions may have been stopped by the broken ice. Dr. Nansen wrote to Baron Toll from Yagor straits, saying that he expected to return to Kotory, Siberian islands, where dogs have been awaiting him. Scott Kettle, a member of the Royal Geographical society and the agent of Dr. Nansen in England, in an interview today said he was surprised that he had not received a telegram from Dr. Nansen, but he thought it probable that the explorer had returned after reaching the pole. He added, however, that he did not know exactly how Dr. Nansen would prove he had been there, since he had no direct observations. Advice received here from Stockholm says that the foreign ministry has received word from the governments of Great Britain and Russia to give all the assistance possible to Professor Andrus' projected balloon expedition to the North pole. Clements R. Markham, president of the Royal Geographical society, is sending a circular to Canada, with a drawing

of Professor Andrus' balloon, asking the Dominion authorities to take every step possible to have the balloon watched for and reported, if seen, to the British government. The Hudson Bay company will bear the cost of these circulars in the northernmost districts of the Dominion. An official of the Royal Geographical society states that a large sum of money has been raised to aid Professor Andrus' scheme, which is thought to be feasible.

Washington, Feb. 15.—The reported confirmation from Archangel of the report of the return of Nansen, the seeker after the North pole, does not really amount to a confirmation, in the opinion of Gen. Greeley and Lieut. Schmitz, the latter is with the expedition of Commodore Melville, who is temporarily absent from Washington, better posted than any other official in Washington upon the characteristics of the North Siberian coast which he has visited, on a governmental mission, being charged with the distribution of records of the natives who aided the survivors of the unfortunate Jeannet expedition. Said he:

"This confirmation of the Irkutsk story from Archangel is as if we had a telegram from Portland, Me., confirming a story from Sandy Hook. Gen. Greeley took a similar view and held that it was inconceivable that the same story should emanate from two places so remote from each other as Irkutsk and Archangel. The news of no way in which news of Nansen's approach to the mouth of the Lena delta should reach the expedition."

With the aid of a chart, Gen. Greeley indicated the vast distance between Archangel and Irkutsk, the latter point being that where the first report of Nansen's return started. He showed that if it was really true that news of Nansen's movements had reached the mouth of the Lena, and had so worked up the river to Irkutsk, then it was probable that the same information could have reached Archangel.

Then there was the same lack of detail about this last dispatch that had been made in the first and this account or even a hint of where Nansen was or how he was communicated with casts doubt on the truth of the report. Archangel said Gen. Greeley, is a large and im-

portant Russian town with good connections with the outer world and if he had been there he would have seen no reason why full details were not obtainable. Gen. Greeley called attention to the fact that the news of Nansen's return had been received from the polar regions anywhere on the Siberian coast, then he himself doubted the correctness of the theory upon which his expedition was based. It would show that instead of there existing a current across the pole, there was a current that swept him up northward of Bennett island to the pole and then returned him to his starting point. Gen. Greeley not unnaturally thought the state of affairs was hardly possible. Certainly there was no scientific evidence of the existence of such an obliging current, and this, therefore, notwithstanding the Archangel story, Gen. Greeley stood unshaken in his disbelief in the return of Nansen as described. Lieut. Schmitz made the point that has apparently escaped observation, that if the first story was true, then Nansen was slightly off or heard from off the Lena Delta away back last summer. Lieut. Schmitz is thoroughly familiar with that country, which is the most northerly Russian post of any significance. The means of communication are reindeer or dogs. The only travel between Yakutsk and Irkutsk, that country, is confined to a few half breed traders, who go up to the latter point in the early winter and stay through until the next spring. Many months are required for the expedition, and no new coming from Ustyansk of Nansen must be very old. Reverting to the possibility of a current, Lieut. Schmitz said: "I would say that it was extremely unlikely, although it was not entirely impossible that after having been sighted somewhere off the Lena Delta, Nansen may have worked his way westward clear to the neighborhood of Archangel. Lieut. Schmitz explained the difficulties that might be encountered in an attempt to trace such a rumor. He said that the natives who might have sighted an Arctic explorer, would have to convey the nature of his undertaking and owing to their ignorance, it would hardly be possible for them to transmit an intelligible account of the event to Irkutsk. Lieut. Schmitz noted the experience of Nordenskiold, who passed one of the Siberian islands

to grant leave of absence to homesteaders on the Yankton Indian reservation and to lease certain lands in Arizona for educational purposes, were considered.

Mr. Ray called up the Reuter resolution, directing the committee on judiciary to investigate the right of the comptroller of the treasury to refuse to execute the law on the ground of its alleged unconstitutionality. It was found that he had violated the law to report by bill or otherwise, which had been amended so as to make the inquiry general into the right of executive officers to refuse to execute laws on the ground of their unconstitutionality. This resolution was the outcome of the decision of Col. Trotter Bowler in the sugar bounty cases.

Mr. Ray explained the long controversy which had resulted over the comptroller's decision. "It must be conceded on all hands," said he, "that the question is not free from doubt. The committee," he said, "thought it best to make the inquiry general instead of confining it to the right of a single officer. The resolution was not reported," he said, "with a view of censuring any officer, but to determine whether it was proper to recommend an amendment for the enlargement or restriction of the law."

Mr. Terry, a member of the judiciary committee said he did not desire to make any factional opposition to the resolution, but he wanted to go on record as opposed to the ulterior purpose sought to be obtained. He believed that an executive officer executed an unconstitutional statute at his peril and that it was therefore his duty to inquire into the unconstitutionality of a statute when the matter was brought directly to his attention. The resolution was adopted.

Bills were passed as follows: On motion of Mr. Bennett, directing the secretary of the treasury to make regulations for the anchorage and movement of rats in St. Mary's river; to authorize the construction of a draw bridge across Lake St. Francis, Ark. A parliamentary wrangle over an hour followed on a question raised as to the privilege of a resolution directing the ways and means committee to investigate the effect of the retraction clause of the McKinley act and to employ an expert for that purpose. The speaker usually sustained Mr. Crisp's point of order.

Washington, Feb. 15.—The house adopted the substitute, reported by the judiciary committee, for Mr. Bowler's resolution to investigate the action of the comptroller Bowler in withholding the sugar bounty appropriation. The substitute provides for an investigation of the power of the executive officers to refuse to comply with the acts of congress on the ground of their alleged unconstitutionality.

At noon today the senate amendments to the bill to incorporate the National Society of the Daughters of the American Revolution,

THE MANITOBA WHEAT.

It Can Still Be Shipped Through Duluth.

Washington, Feb. 15.—(Special to The Herald).—The secretary of the treasury will decide in favor of the American railroads in the contest over the right to bring wheat from Manitoba and other Canadian provinces to Duluth elevators and afterwards reship it to Canada. The department holds that this is practically a shipment of goods in bond. The fight was made by the Canadian Pacific road, which is losing considerable in freight owing to this plan of shipping grain.

Work on the Aitkin Bridge Temporarily Stopped.

Washington, Feb. 15.—(Special to The Herald).—Owing to the fact that Representative Towne has not yet been able to introduce a bill authorizing the construction of a bridge over the Mississippi river at Aitkin, Maj. Jones, government engineer, has ordered work upon the structure suspended.

As soon as Mr. Towne can secure the necessary data from the department he will introduce the bill and push it through the house.

THE FIGHT

Maher and Fitzsimmons Will Not Come Together Until Next Friday.

The Official Notice of the Postponement Given By Joe Vendig.

Maher Not Fit to Enter the Ring Before That Date.

El Paso, Tex., Feb. 15.—The news sent from Las Cruces last night to the effect that Maher's eyes are improving so rapidly that he would be in condition to enter the ring on Monday was very comforting to the crowd which is waiting for the big event. Many efforts have been made to induce Stuart to bring off one of the smaller fights before the big one, but he positively refuses. He realizes that his chances for pulling off the second fight are much less than for pulling off the first one, and that he has still less chance of getting the third off. He is bound to get Maher and Fitzsimmons into the ring, and will take no chances on anything that may interfere with the big fight. Walcott and Bright Eyes, who were to have fought today, will both weigh in and demand their forfeit, \$250. There was a lively shooting affray on San Antonio street last night between two sporting men. They riddled the windows of the office of the Santa Fe railroad, but hurt nothing else.

A telegram has been received from Connelly saying that Maher would be in no shape to enter the ring before Friday of next week. He will be all right by that time it is thought. At 11 o'clock today Walcott and Bright Eyes weighed in at the training quarters of the former. Both were well under the limit of 140 pounds. O'Rourke, backer of Walcott, will not claim forfeit for the postponement of the fight. He and Kinney will bring the men in upon the scales Tuesday and again go through the ceremony of weighing in. Connelly has asked for a postponement of the Fitzsimmons-Maher fight until Friday, but no action has been taken yet. Julian says he will do nothing until Monday. If Maher is not in shape by that time, Julian will decide on his plan.

Later—Joe Vendig has announced officially that the fight is postponed until next Friday.

MURDER AT KANSAS CITY.

Fatal Quarrel Between Two Telegraph Operators.

Kansas City, Feb. 15.—George Crooks, aged 19, shot and perhaps fatally wounded Fred Wessel, aged 21, here this afternoon. The bullet entered Wessel's abdomen and his condition is serious. Crooks is in jail.

The men are Western Union telegraph operators. They operated either end of a local wire and yesterday quarreled. They had agreed to fight it out today at the telegraph office, but accidentally met on a street car bound for the city. Wessel dragged Crooks from the car and was jumping on him, when Crooks shot him.

THE GOLD DEPOSITS.

Deposits Covering Half the Entire Loan Received.

New York, Feb. 15.—At the sub-treasury it is said an official report of the gold deposits on account of the completion of the first 30 per cent installment on the new government bond issue will not be ready until this afternoon. It is understood that a report of the deposits with the federal government depositories in this city will be received by Assistant Secretary Jordan, and this information will also be given out.

In a general way it is believed that the aggregate deposits to date will be sufficient to cover one half of the entire loan, premium included. Sub-treasury officials express the opinion that very few of the subscriptions have been defaulted on. The deposits and withdrawals of gold to-day have been very light, as compared with recent averages.

MYSTERIOUS ASSASSINATION.

Louisville, Feb. 15.—A special to the Post from Augusta, Ky., says Robert Laughlin, a prominent farmer living three miles from this place was assaulted last night by unknown assassins, who stabbed him several times. His wife was murdered and also her 14-year-old niece, and their bodies cremated by burning the house. Laughlin escaped in the darkness. The people are greatly excited and the affair is wrapped in mystery as there is no clue to the murderers.

REQUISITION PAPERS READY.

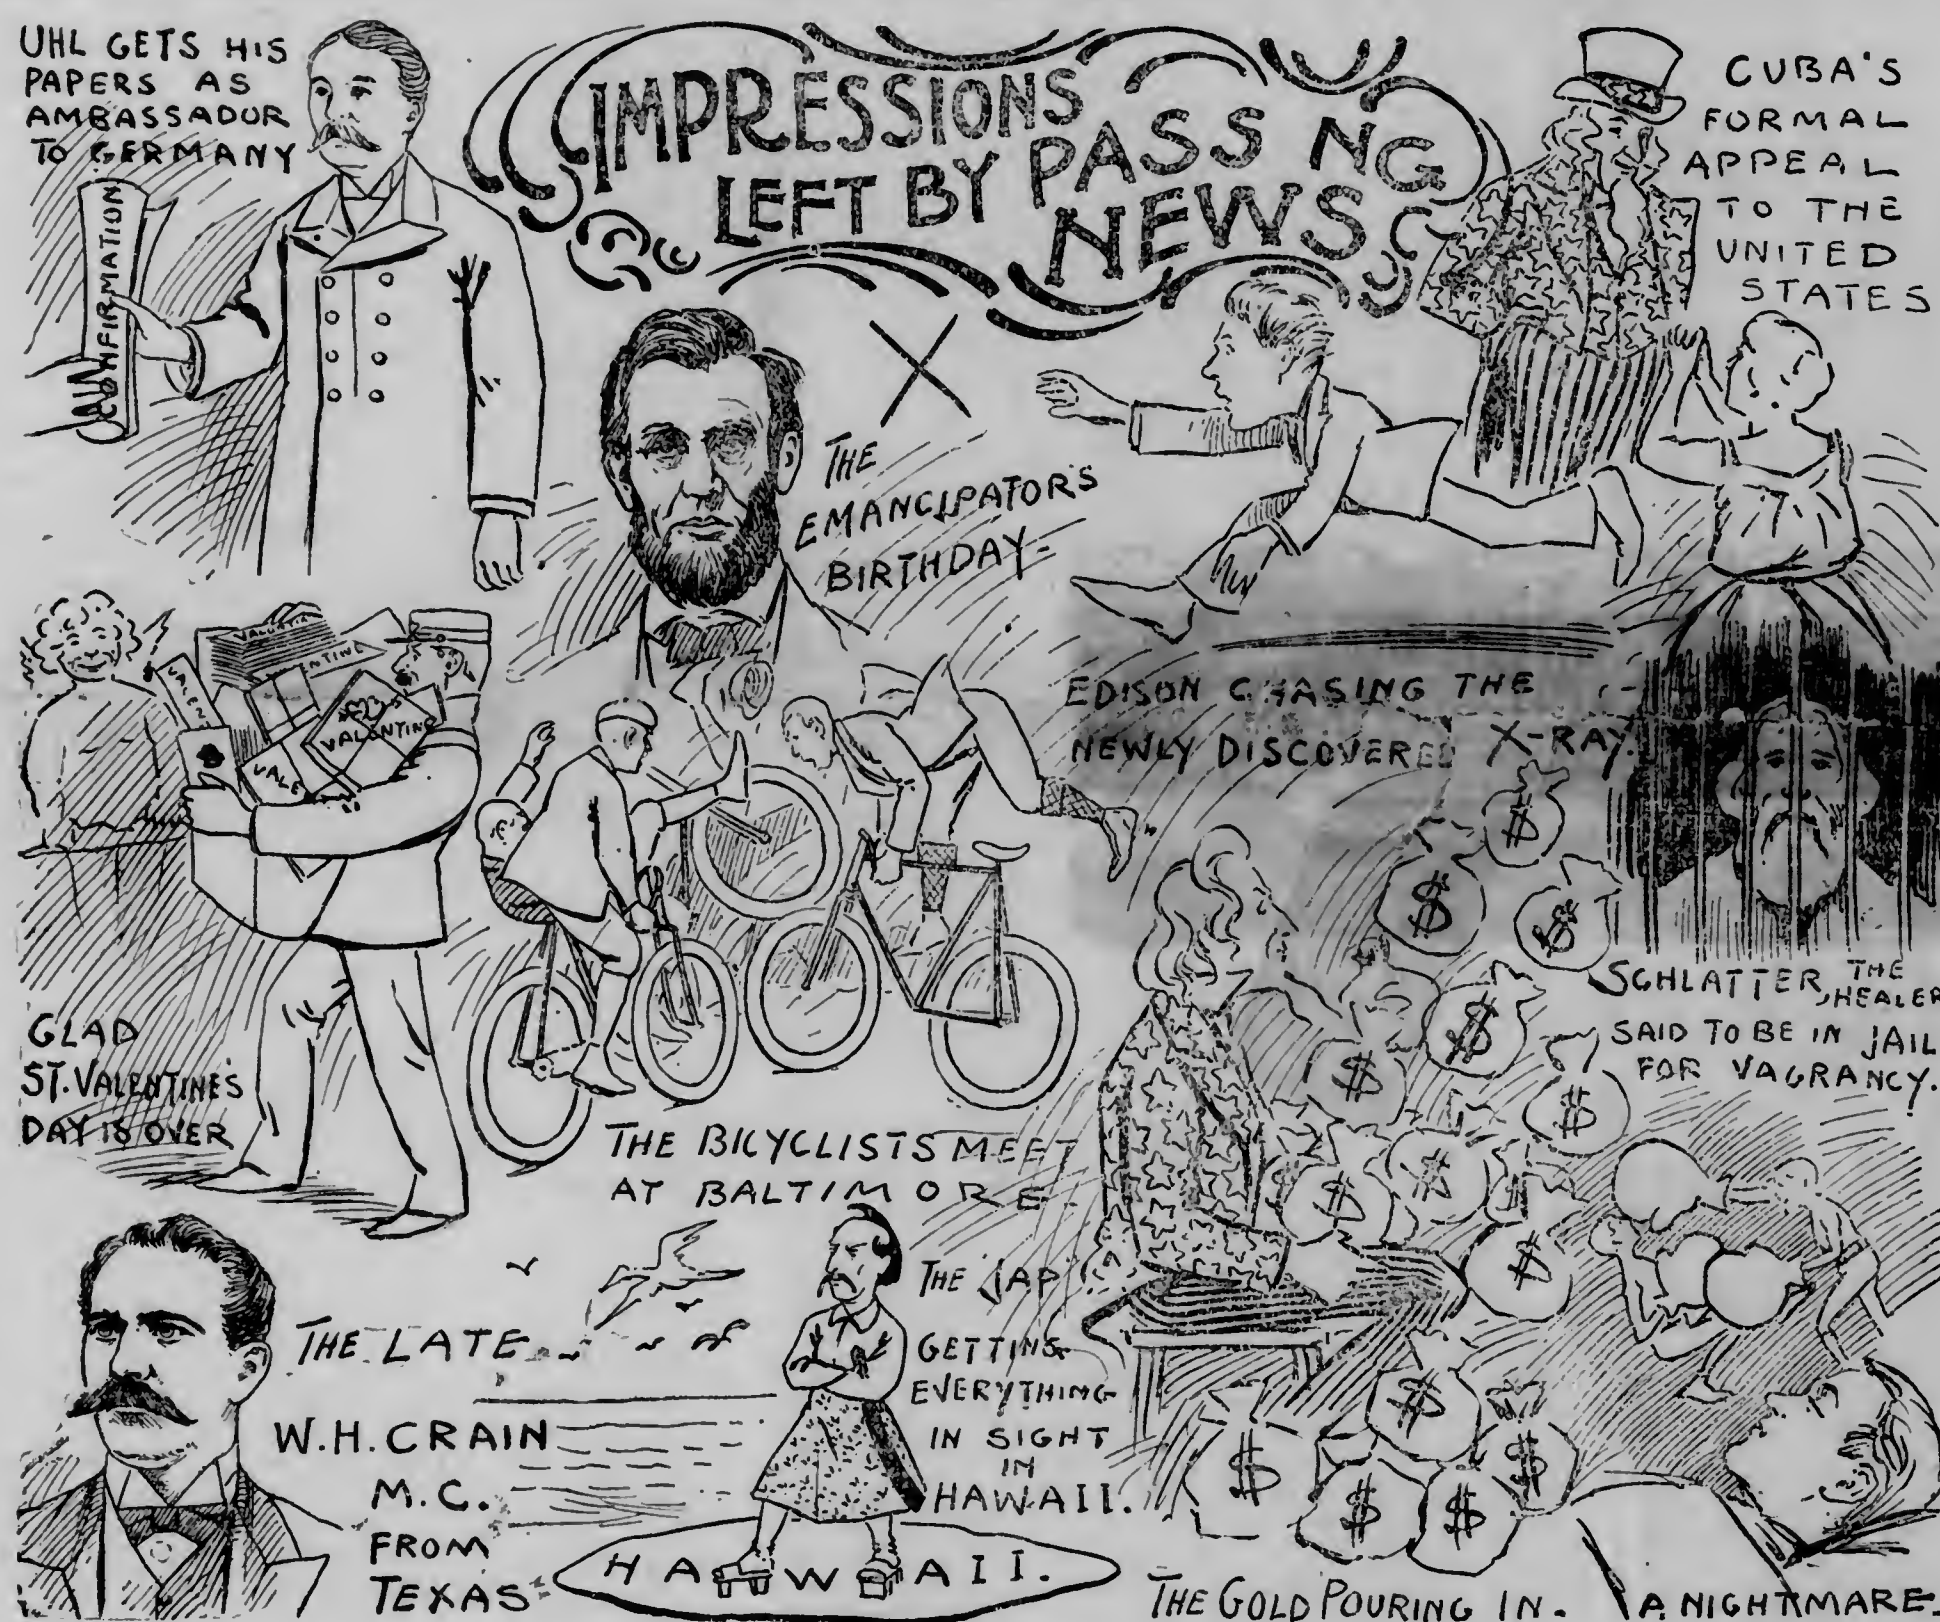

Frankfort, Ky., Feb. 15.—Sheriff Plummer has returned from Frankfort to Newport with the requisition papers from Governor Bradley to Governor Bushnell for the extradition of Jackson and Walling for the murder of Pearl Bryan. As the attorneys want to be heard Sheriff Plummer will not go to Columbia till tomorrow night. He will present the papers to Governor Bushnell Monday.

POLITICIAN INJURED.

Kansas City, Feb. 15.—A special from Macon, Mo., says: Richard P. Giles, of Shelbyville, Democratic candidate for congress from the First district, was thrown accidentally from his carriage between Shelbyville and Shelbyville. His right arm was broken and he was otherwise seriously injured.

REARRESTED FOR MURDER.

New York, Feb. 15.—The two Fitzsimmons boxers, William and James, have been rearrested in connection with the murder of Max England in the deaf and dumb institution on East Sixty-seventh street.

Of Men's and Boys' Suits, Overcoats and Ulsters. We shall not call it a price sale, a quarter price sale, but a plain Revised Price Sale, and when we revise the prices we shall keep in mind that balmy springtime is almost here, and if we do not sell these goods now we probably will not this season, and so the revised price will mean a Cut in the Quick, a Slashing to the Bone—i. e., never again will you buy a Suit or Overcoat so cheap as you will this week. We do not say how many there are, but this we do say, that the prices we shall offer will create a demonstration, a stir, a rush among those who want the Biggest Value Ever Heard of for their money. No room here to quote prices; but Come, Select, and the price named will be full of satisfaction—the saving remarkable.

FOR ARBITRATION.
A Call For a Permanent Court
Demanded By New Yorkers.

New York, Feb. 17.—A call signed by Mayor William L. Strong, Bishop Henry Potter, Benjamin H. Brewster, ex-Judge Charles D. Daly, President Seth Low and William E. Dodge has been sent to a number of prominent men in this city and Brooklyn looking towards the formation of a committee to further the movement now in progress in England and this country for the establishment of a permanent court of arbitration to settle all disputes arising between the United States and Great Britain.

It is proposed to ask fifty representative citizens of New York and Brooklyn to form a committee which shall cooperate with similar committees in other cities in calling a meeting to be held in Washington to take such action as will best further this object.

WARLIKE COMMENT.

English Movements a Menace to Venezuela's Autonomy.

Carnegie, Feb. 17.—The story of an English vessel taking soundings at the mouth of the Orinoco provokes much warlike comment. The people of Ciudad Bolivar, the capital of Guayana, say the vessel is there for the purpose of determining whether war ships are needed to hold the Orinoco, which is Venezuela's strong strategic position. The government has been warned that as England is increasing her force in men and cannon at the stations on the Amazon and Cuyuni rivers, the latest move betrays the integrity of the nation. The press says that now is the time to teach English arrogance a lesson.

HAVANA'S SUGAR CROP.
Washington, Feb. 17.—Consul General Williams has submitted to the department of state, tables prepared by a competent sugar statistician showing that on Jan. 1, only 24,329 tons of sugar had been received at Havana of this year's crop against 145,277 tons received at the same date last year. United States Consul Hyatt at Santiago reports under date of Feb. 1 that the planters in that part of Cuba are now grinding the unburied portions of their

The report of the retrenchment committee was completed on Saturday evening and will be presented to the common council tonight. It is a document that should interest every citizen of Duluth, and should be carefully read, and for this reason, The Herald publishes it in full. The committee says:

Complying with your resolution, approved Oct. 29, 1895, for examination into the cost of administering the several departments of the city government, the seven business and civic bodies therein mentioned designated the citizens named below to respectively examine them in the inquiry: Taxpayers' league, Z. D. Scott; Trade assembly, Mrs. T. C. Akun; Business Men's association, Charles H. Haines; chamber of commerce, E. R. Brock; Abolition union, T. H. Hawkes; Commercial club, C. Sloan; board of trade, Frank E. Wyman; to represent the common council, James P. Hays; Thomas Oatson and Thomas P. Treveling were designated. These constituted the committee met in the council room in the city hall on Nov. 10, 1895, and organized by the choice of the Hon. James T. Hale as chairman, and T. H. Hawkes as secretary. Mayor Hale kindly rendered us his office in which to hold our future meetings, and all subsequent meetings have been held in said office.

Sessions have been held two or three times a week, and have been held every day. Representatives of every board and department were called before the committee and asked to make a statement of the city's debts, its assets, revenues and disbursements; its duties, its work and rate of every of every officer, clerk and employee of the city, its mechanics and laborers in each department, all of which were carefully ascertained. Statistical information touching the operations of each department was obtained.

Comparisons with other cities have been made, and in each case where conclusions were drawn, the topography of the country and other causes of every city have been taken into consideration. The cost of municipal government is regulated by the expense of territory as well as by the number of people.

We find that owing to the length of our city, compared with its breadth, the expense of maintaining all of the various departments is necessarily greater than that involved in a city compactly and symmetrically built. These facts are considered by your committee in making their recommendations.

The Bell & Eyster failure occurred in the fall of 1890 and the American Loan and Trust company in the spring of 1892. In the case of the former we understand that unless steps are taken immediately to pay the claim of the city, the bondsmen will be relieved of all liability. It seems imperative to your committee that collection of these claims be pushed without delay.

As the present fiscal year is not closed, it is impossible for your committee to give a tabulated statement of later date than that given below, but references are made to the condition of affairs at the time in a succeeding paragraph. WANT THREE MILLIONS.

The Needs of Duluth-Superior Harbor Presented.

Washington, Feb. 17.—(Special to The Herald.)—The joint harbor commission of Duluth and Superior, which appeared before the river and harbor committee of the house, urged the immediate appropriation of \$3,000,000 for the necessary improvements under the continuous contract plan, of the joint harbors of Duluth and Superior.

Carefully and accurately prepared tables, showing the growth of the marine business at the head of the lakes, were submitted, also comparative statements of the business of various lake ports with regard to the size of the vessels trading there.

Among the most striking exhibits laid before the committee was the statement of the low tonnage now being constructed in various lake shippards, something like sixty-five vessels being shown, nearly all of larger carrying capacity than any now afloat, and all of the highest being specially constructed for the needs of the trade at the upper end of Lake Superior. In this connection it was also shown that the present depth of water courses would deprive these vessels of about 12 per cent of their total carrying capacity, based on a 144-foot draft.

A large map of the joint harbors of Duluth and Superior was placed before the river and harbor committee, and was used by the various speakers to illustrate their remarks. The house committee was especially impressed by a representative delegation asking for even less than the government engineer estimated, and that the civilians were in perfect accord with the recommendations of the United States engineer corps.

CONDITIONS IMPROVING.

Increased Demand in England For American Securities.

New York, Feb. 17.—Amos Oppenheim, vice president of the Chicago Great Western Railway company, arrived from England on the St. Louis. Mr. Oppenheim was at the Fifth Avenue hotel last night and said:

"The Englishmen have stopped selling our securities. I have been six weeks in England and I learned that the English financiers believe that American financiers are all right, but they don't believe that our securities are a revenue to meet our expenses. They say that if we had sufficient revenue, the so-called 'consolidated' of depositing and withdrawing gold from the sub-treasuries would be broken. There is a general feeling on the other side that the whole world is entering on a period of prosperity. The Englishmen are now buying our securities all reports to the contrary notwithstanding."

"In all the recent trouble they did not hesitate to advance \$1,000,000 for the betterment of the city of St. Louis. Before six months have passed, all first class American securities will be in good demand in England as there is a large amount of idle money, which sooner or later must seek investment here. The Englishmen are now buying our securities to all other kinds of English securities. Money in London is a drug at three-quarters of 1 per cent a year. The surplus revenue collected by the English government for last year was \$5,000,000 or \$50,000,000. English railroad earnings and dividends are on the increase. I think they look bright for American securities in England."

SHOOTING PRISONERS.

Inhuman Policy of the New Spanish General.

Kansas City, Mo., Feb. 17.—A special to the Herald from Fortia, Kan., says that the Spanish general, at Fortia, a young lawyer well known here, has just arrived from Cuba, where he was a prisoner. He with about 400 others were captured in one of the battles near Havana. All but one and fifteen other Americans were lined up and shot. The American consul saved him. Christy, a member of the pioneer families of Coffey county, is an enthusiastic Cuban patriot and claims that he was captured by the Spanish general Havana which will soon fall. He also says that since the new Spanish general has taken command, no prisoners are taken.

Havana, Feb. 17.—The governor and captain general of Cuba, has issued a proclamation placing the inhabitants of the provinces of Puerto Principe and Santiago de Cuba under military surveillance, nullifying all passes hitherto issued and commanding the military and commercial establishments in the provinces to be vigilant in this work. The first and second army corps judicial attributes. Prisoners caught in action will be subjected to the most summary trial, without any other investigation, except that indispensable for the objects of it.

IT IS EXPENSIVE.

The Free Water Delivery Cost \$100 a Day.

The distribution of free water by the city will probably be continued for a week or ten days longer, when the new intake and intake well at the old company's pumping station at Fifteenth avenue east will, it is expected, have been completed.

The expense up to date of the water distribution amounts to the sum of \$450, and the present cost is about \$100 a day. The distribution has been carried on since Jan. 2 last, and there are no extra men in this work save seven at \$3.50 a day for each team and driver, an extra man with each team at \$1.50 a day, besides a foreman, a boiler man and an engineer. The water is delivered on the track free by the railroad companies.

NO CHOICE YET.

Louisville, Feb. 17.—A special from the Herald says that the call for the twenty-fourth senatorial ballot showed the smallest attendance of the session, only 100 members being present, necessary to a choice fifty-four. The expected addition to the anti-Hunter vote is not material.

Hunter, 48; Holt, 3; Carline, 2; McCrory, 1; Cochran, 1; Bates, 1. No attempt was made to take an additional ballot.

WEST END

Company H Members Oppose the Retrenchment Committee's Suggestion.

Great Eastern Hall Could Be Obtained at a Cheap Rental.

Company Would Disband if There Were But One Armory.

The moving of West Duluth armory to Duluth, as recommended by the retrenchment committee, will meet with strong opposition from Company H. It is even claimed that the company will disband rather than go to Duluth to attend drills. As far as the rent of the present quarters is concerned, however, it is acknowledged that the price is too high for the accommodations, and that the members of the company would be perfectly willing to put up with a cheaper room for armory purposes.

It is understood that a fair and reasonable offer has been made by the owners of Great Eastern hall to permit the militia boys to drill in the place once a week. The hall is much larger and more convenient than the present armory, and yet it can be obtained at a much lower rent than the city is now paying for the purpose. Change of quarters and lower rent will probably be the attitude taken by the West Duluth adherents in this matter.

The combining of the two armories in one, and the forcing of Company H to go to the city proper to drill means the disbanding of the company at once, so say the members of the company.

DIED OF CONSUMPTION.
James Delahant, a single man, 34 years of age, living with his parents on Fifty-sixth avenue, died of consumption, after a long illness, on Saturday morning, at his home, 565 North Main street. The deceased had been suffering from the disease for about a year, and his death was expected at any time. He had lived in West Duluth two years, and was well known and highly respected. The funeral will take place on Wednesday at St. James church, and interment at the Catholic cemetery.

Who does not know girls who are continually in tears? Who always see the dark side? Who have frequent fits of melancholy with out any apparent cause? The intelligent physician will know that it is some derangement of the complicated and delicate feminine organs. The young girl suffers, bodily and mentally, in silence. There is undue weariness, unexpected pain, unreasonable tears and fits of temper.

Dr. Pierce's Favorite Prescription is a wonderful power over woman's delicate organism. It is an invigorating tonic and is specific for the peculiar weaknesses, irregularities and painful derangements of woman's system.

Careless, easy-going doctors frequently treat their women patients for biliousness, nervousness, dyspepsia, liver or kidney troubles, when the real sickness is in the organs distinctly feminine, and no help can come till they are made perfectly strong by the use of Dr. Pierce's Favorite Prescription.

QUEEN VICTORIA'S THRONE.
The throne of England, so splendid in its rich trappings of silk, velvet and gold wire, lace and tassels, is simply in the New York Mail and Express. It is the oldest and most magnificent relic of the early history of the old oak table and the name of its maker are both unknown. The wood which comprises this throne is very hard and solid, and is so much known and known that the chair has been "kept in the dry" and well covered with rich cloth of various kinds since the day of Edward I. The back and sides of the chair were formerly painted in various colors, and the seat was of a round sandstone. This stone, which is supposed to be of talismanic powers, is 16 inches in length, 12 inches in thickness, and 12 inches in width. opinion that our estimate of saving can be very materially increased.

A great amount of the necessary information has been very difficult to obtain, and as your committee is made up largely of men actively engaged in business, who have consequently been unable to render continuous service, progress has been necessarily slow.

We have endeavored to obtain our information only from the best and most reliable sources, and in the main our statements will be found to be correct.

In considering the different departments we have endeavored at all times to deal with the officer rather than the official, and have not deemed it our duty to venture into the efficiency or honesty of any officer.

In recommending salaries we have taken into consideration not only the necessity for economy but the greatly reduced cost of living; the salaries of the same of officials in other cities about the same size as Duluth; the salaries of the same of all business houses and private corporations; and the fact that there are a large number of really competent men who would be glad to fill the positions at the salaries named.

In suggesting changes we have had in mind the difficulty and public convenience as well as economy.

In some cases the changes proposed may conflict with state laws or the city charter in which instance we suggest that an effort be made to have the law or charter amended so as to meet the emergency.

In other cases it may be possible to accomplish the same results in a better way than that suggested in this report, and if so your committee would heartily concur in it.

In making this report we have seriously considered the financial condition of the city, the need for economy, and the effect of the recommendations and changes offered.

That a policy of rigid economy for several years is essential to the future of the city for the maintenance of the good name of our city must be evident to every thoughtful man.

We sincerely hope your honorable body will see your utmost endeavor to see that such a policy is immediately carried into effect. And we would further request that you submit to the school and other boards not under your immediate control copies of this report for their consideration.

Respectfully,
James T. Hale, Chairman.
J. T. Scott.
Frank H. Wyman.
R. L. Brown.
R. C. Sloan.
Thomas J. Trevillion.

Mrs. Akin agreed to the above report, except as to the salaries of the rank and file of the various departments, which will be presented to the board of public safety for their consideration.

THE MINORITY REPORT.

Your delegate from the trades assembly does not concur with the committee in regard to the reduction of the salaries of the rank and file of school teachers. In making about having been refused advances. The banks are not carrying the city; we do not borrow money from the banks, but we do borrow from other sources. The city meets its expenditures from its revenue, and any statement about borrowing, either as a matter of fact or as attributed, is a total misconception, both as to the facts and as to what I said.

It was explained.

"I gave the committee a full explanation of the matter, owing to an error of some kind in the preliminary to a report. I said that the committee had been refused advances. DISACRE

Retrenchment Committee's Report Does Not Satisfy All People.

Treasurer Voss Points Out Some Misstatements in the Document.

He Claims the Committee Did Not Grasp the Situation.

Boobies of the report of the retrenchment committee are beginning to be heard, and it would appear that, in spite of the numerous errors and blunders, the committee is not grasping the situation.

The report contains, according to the city treasurer, certain statements concerning his department that would indicate a failure to thoroughly grasp the situation.

The report contains inaccuracies that are patent on even the cursory reading I have been able to give it, said Mr. Voss. The impression seems to have taken root in the minds of the members of this committee that the city has been borrowing of the banks and that the banks have lately refused to advance any more money.

Another point for the "boobies" in my statements about borrowing money, I said, is that the committee has been misled by the banks and that the banks have lately refused to advance any more money.

DOES GAMBLING EXIST?

Police Are Beginning to Learn That it Does.

The "discovery" made by Mayor Lewis a week or so ago that gambling really did exist in Duluth astounded the police department, although it did not surprise anybody else very much. Since then every officer at the top of the force has been falling over himself in his eagerness to ferret out gambling.

A little story is going the rounds in connection with the raid made by Mayor Lewis, which may or may not be true and can be taken for what it is worth.

The story goes that Mayor Lewis received an unnamed letter informing him that a certain person had lost \$100 gambling in the joint known as Dahl's place. The mayor called on the chief of police and was assured that there could be no gambling existing in the city without his knowledge.

The mayor went away. That night he dropped in the headquarters of the chief of police and met Lieut. McLean.

"Are the detectives here," he asked. "No, they have gone home," was the reply.

"He's gone home, too," he next asked. "All right," replied his honor in a way that indicated the chief was disappointed. "Now you come with me."

Lieut. McLean went and the place was found and "pulled," as the police say.

There was considerable surprise when some persons got up the next day. An individual wandered into the Herald office about noon of the day on which the arrest was made and said:

"In the man who lost \$100 in that joint and I want you to deny that I wrote that letter which was not signed, 'Dahl's place.'"

"Do you want your name used?" was asked.

"It is a matter of common observation," said Mr. Davis in beginning, "that each year our foreign and foreign-born population is increasing in difficulty, complexity and volume. This is due to the growth of our nation and the tendency of the times to bring together nations of different races and religions."

It was this tendency, said the senator, which explained the fact that the United States was involved in more difficulties with Great Britain than with any other country.

MONROE

Senator Davis Addresses His Colleagues on the Famous Monroe Doctrine.

Our Foreign Relations Increasing in Complexity and Importance.

The Principle Maintained Is Recognized and Enforced By European Powers.

Washington, Feb. 17.—In the senate today, Mr. Davis, of Minnesota, secured recognition at 10:30 for his speech on the Monroe doctrine.

The senator left his desk in the rear of the chamber and took an advantageous position at Mr. Hale's desk near the front and middle of the chamber.

He spoke without manuscript or notes, but before him was a portfolio containing numerous historical papers to which he referred.

AFRAID OF CONSUMPTION.

People who lose flesh are in danger of consumption. In many cases loss of flesh is the first symptom of the dread disease.

Light weight is too often a sign of some wasting disease which gets its first start from indigestion. Cure the indigestion and health, strength and flesh will be rapidly regained.

All physicians are agreed that the most important thing to be done in such cases is to improve the appetite and digestion, and this cannot be done there is very little hope for strength, flesh and pure blood and strong nerves can only come from plenty of wholesome food well digested.

Stuart's Dyspepsia Tablets rapidly increase the weight, the hectic flush soon leaves the consumptive's cheeks, the skin assumes the hue of health, night sweats cease, the cough dies away and the emaciation is lost under a coating of warm, normal flesh.

Take at once these Tablets after meals, they will increase the appetite, enriching the blood and remove those miserable feelings which only the dyspepsia can appreciate. Stuart's Dyspepsia Tablets are sold by druggists at 10 cents for full sized package. A book on stomach and digestive troubles sent free by addressing the Stuart Company, Marshall, Mich.

SHOOTING THE RAPIDS.

A Sharp Eye, A Perfect Nerve, Iron Muscles—The Indian's Endowment.

And all this, not by skill alone, but by a born intuition and a perfect constitution is the Indian enabled to cope with nature in her most tumultuous moods, and the reason, because he has been reared in nature's own lap, has looked to her for food in times of health and for medicine in times of sickness and to this latter is he indebted for the fact that he is today a living example of perfect health and longevity. He has never been harmed by poisonous mixtures; but on the approach of disease he has turned to his great remedy—made from the roots, herbs, barks and gums of the forest—that most precious of nature's compounds

NEW COLLECTING PAD.

We have had the craze for Parisian "artiches" or postcards, and now come cards that the fat of the hour in the gay city is to have them made by artists in some fantastic manner by the pen of a famous artist. The cards are made of cardboard, and in size are four inches by six. The figures are painted and printed in gay colors, and have the queer impressionable dash about them that made the artiches so fascinating. Grasses, Cherries and Wilhelms, the famous artists, have designed to give their time and talent to designing these cards, which, in many cases, are genuine works of art. One that is particularly striking picture is a black gown with a diamond-shaped opening at the neck, and through the air (revealing the edges of many frilled and Frenchy petticoats), and bearing an hilarious-looking scroll with an inscription in doggerel Latin. Another shows a Pantheon fishling in the bottomless pit; he has just succeeded in entangling St. Peter, who has been having a convivial time with wine and cards.

THE MODERN WAY. Commends itself to the well informed, was formerly done in the crudest manner and disagreeably as well. To cleanse the system and break up colds, headaches and fevers without unpleasant after effects, use the delightful liquid laxative remedy, Syrup of Figs. DELICATE

Such is the Condition of Affairs in the French Parliament.

Premier Bourgeois and President Faure Discuss the Prospective Upheaval.

The Republicans and Moderates Agree That a Dissolution is Advisable.

London, Feb. 17.—The special dispatches from Paris this morning all agree as to the gravity of the French crisis. The Paris correspondent of the Times telegraphs as follows to that paper: "If the senate stands firm, there are only two alternatives, the resignation of the ministers or the expulsion of the senate by a mob. The latter would mean the destruction of the constitution by a revolutionary convention. The situation is the most delicate we have seen in twenty-five years."

According to a semi-official statement, M. Bourgeois, the premier, had an interview with President Faure Sunday afternoon and explained that the conflict of the senate with the chamber had assumed such a character that a resignation of the ministry would not solve the crisis. The cabinet had, therefore, decided to await the further expression of the opinion of the chamber, the ministers agreeing that the cabinet would disregard the confidence of the chamber.

A dispatch from Paris to the Post says: "The real origin of the crisis is the determination of the senate to throw the radical ministry out of office. The senate, on the 10th day of February, 1926, upon a judgment rendered and justified by the chamber, decided to expel the ministry. The chamber, on the 11th day of February, 1926, upon a judgment rendered and justified by the chamber, decided to expel the ministry. The chamber, on the 12th day of February, 1926, upon a judgment rendered and justified by the chamber, decided to expel the ministry. The Wonder Continues...

*Selling for Half
And Less than Half Price!*

How in the World Is It.... That....

Burrows will persist in selling such perfect clothing for such unremunerative prices. Everybody in the business knows that they are positively worth more money; at least, thousands of buyers are ready to testify—never in their lives before knew such good clothing being sold so cheap. We revolutionized prices and maintained the *Highest Standard of Excellence* in workmanship, quality and fit, and at the same time give you an unlimited assortment positively unmatched by all other clothing stocks in the city combined.

The Garments that are selling

For Less Than Half Price.....

315 of our very finest Tailor-made Men's Suits, ranging in price from \$15.00, \$18.00, \$20.00, \$25.00 to \$30.00.
479 stylish Overcoats and warm comfortable Ulsters.
200 pairs of Men's Tailor-Made Trousers, together with 300 Boys' and Children's Overcoats, Suits, long and knee Pants. These garments consist of one and two of a kind and as the result of our great Half Price Sale are left from lots where we had 30 and 40 at the commencement. All these garments have been placed on separate tables and are melting away as quickly as snow under a July sun.

SELLING AT HALF PRICE

All our full and complete stock
Men's Overcoats, Ulsters, Caps, Gloves and
Mittens, Boys' and Children's Overcoats,
Ulsters, Reefers, Caps, Gloves and Mittens.

While it is a positive fact that goods are in this sale at a less price than dealers even would have to pay for them at wholesale, it must be kept in mind there is a limit to the number of each, and the early buyer will be the gainer.

STORY OF THE VAULT.
The wedding of Miss Lucinda Stokely and Charles E. Vault will take place at 8 o'clock in the afternoon, Rev. Dr. Ryan officiating. Miss Jim E. Vault and Mr. Roy S. Hunt will attend the wedding at the altar. Mr. and Mrs. E. Vault will leave at the 1:45 p. m. train for St. Paul.

HIBBING HOTEL OPENING.
Next Saturday the formal opening of the new Hibbing Hotel will take place, and the proprietor, George W. Sykes, has issued unique invitations for the event.

Pulled Her Leg.
Ambrose Norick's wife says he pulled her leg. This is an invasion of the wife's prerogative. He also pinched her, so she had him arrested. He pleaded not guilty in the municipal court this morning, and his trial was set for 9 o'clock tomorrow morning, his bail being fixed at \$25, in default of which he was committed to jail.

NEW ROW OF FLATS.
David T. Adams Will Erect Another Building.

Plans are out for another row of flats, to be erected by David T. Adams, who is one of those men who believe in putting the money they make out of iron lands in good revenue-producing city property. The new building will be the finest of its character in the city. It will be built on East First street, adjoining his present row, and will be about seventy by ninety feet in size, three stories high and built of brick and stone, and in style will be somewhat similar to those already built.

JUDGE AYER MARRIED THEM.
Mr. Charles Williams and Mary L. Connelly, giving their address at Davenport, Ia., appeared at the district clerk's office this morning and asked for a marriage license. This being provided, Mr. Williams asked the clerk if there was any one in the building who could perform the ceremony. He was referred to Judge Ayer, and with the assistance of C. O. Baldwin and Deputy Sheriff Bates, Judge Ayer tied the knot in his usual style, which is characterized by simplicity and dispatch.

NEW SALE

Judge Morris Orders Howard & Haynie Stock Sold at Auction.

Refused to Confirm the Sale to D. M. Hodge of Winona.

That Gentlemen Failed to Appear and the Order Was Made.

The argument on the application of Assignee Nichols to confirm the sale of the Howard & Haynie stock to D. M. Hodge was continued yesterday afternoon. It was decided last night that it would not be at all likely that the mystic Mr. Hodge, of Winona, would get the stock. It was not definitely settled, however, and Mr. Hodge was given until today to show up. He did not materialize. He still remained in the mystic land, in which, for reasons of his own, he decided to stay for the time being. As Judge Morris did not care to award the sale to a man who might be a myth, as the opposition charge, he refused to confirm the sale. In order to get a perfectly fair sale, and leave no chance for mystery or for mysterious people to put in a bid and then fail to appear when they received the award, he ordered a new sale by public auction, to take place Friday, Feb. 28.

COUNTY HOSPITAL IDEA.
It Was Originated By the Leading Taxpayers.

The question of building a county hospital is to be discussed at the adjourned meeting of the business men's association at the city hall tomorrow. There have been numerous incorrect reports regarding this project given circulation by those who are opposed to it. The following extract from the proceedings of the county commissioners on Feb. 8 will, perhaps, be a complete answer to some of the misstatements, as it shows that the board acted only after receiving a petition signed by many of the heaviest taxpayers:

Resolution by Commissioner Miller: Whereas, a petition has been received by this board, signed by Ray T. Lewis, John Ray, Walter Ames, B. C. Church, G. G. Harman, James Le Roy, E. C. Grady, J. H. Triggs, William E. Richards, A. H. Macfarlane, H. M. Fetter, S. D. Allen, P. B. Smith, G. T. Peter and Son, B. Silbertson, Pintos & Watson, John C. Hunter, R. M. Hunter, B. G. Segor, Suffer & Co., A. L. Ordan, C. E. Lowmyer, E. S. Matter, A. C. Wiley, T. W. Hugo, Frank Ray, J. B. LeMay, J. H. Carey, Clinton Mackell, P. J. Harlow, F. J. Harlow, J. E. Stryker, J. Boyce, Marshall Wells, Hardware company, W. S. Woodbridge, J. H. LaVaro and a large number of other taxpayers who are heavy taxpayers, urging the necessity for erecting a hospital for county patients.

After due consideration it is the sense of this board that a committee of three, of which the chairman shall be a member, be appointed by the chairman, to have to do with the establishment and what incidental expenses are necessary for erecting an institution of this kind, and in order to reveal all these matters would be advisable, in our judgment, that this committee visit some Eastern cities and look up the matter thoroughly before anything is done.

As the expenses will be permanent and regular, too much care cannot be taken, and to this end we would urge that the committee use all means in their power to make a full and complete report to this board not later than March 1, 1896. The expense incurred by this committee, such as traveling expenses, including railroad fare and board bills, to be ascertained out of the county revenue fund.

Commissioner Draham moved the adoption of the resolution, and it was declared adopted by a unanimous vote.

THE FORCE MAIN.

Some Work May Be Done at Once.

City Engineer Patton told the aldermen yesterday afternoon that there is about 500 yards of rock work to be done in the first section of the trench for the force main of the municipal waterworks, that section extending from Lakewood to Lester river, and little of which, however, is visible on the surface, and to reach which some earth excavating would be required. The feasibility of proceeding immediately with the work on the trench, in order that labor might be provided at this time when the need of it is most urgently felt, was discussed. It was considered that, while it would not be wise to proceed with the work excavation in the face of the certainty that the action of the frost would render it necessary to do some, if not all that part of the work over again, there could be no objection to proceeding with the excavating, which could be done now as well as at any time. The engineer said that in the other two sections of the contemplated trench there is considerable rock work to be done, the rock being visible at the surface, and he was requested to advise with the committee on the subject.

In regard to the material to be preferred for the new force main, the city engineer pronounced in favor of steel, both on account of its cheapness and the fact that steel pipe can be produced here. While steel, of course, costs more per pound than cast iron, its superior strength renders it possible to make it tubes very much thinner and lighter, making about a saving of about \$40,000 in the first section, from the pump house to Lester river alone. This will cover the increase in cost of a 24-inch main over that of a 20-inch main, and by reason of the economy in the use of the steel, the use of a great deal less steel to accomplish the same results, its use is desirable. Then, too, according to Mr. Patton, the use of steel tubing will allow the trench to be made narrower by eight inches throughout its length, owing to the fact that no allowance would have to be made for the haub that are cast at the ends of the pipes.

The engineer states that steel is coming into general use. Allegheny City, Pa., has a force main of steel, 40 inches in diameter, and 10 miles long. Rochester, N. Y., has just finished replacing the iron main that connected the city with the source of supply, which is Hemlock lake, 25 miles distant, with steel throughout. It was found that the iron pipe in the Rochester waterworks force main was, after twenty years' service, so choked with rust tubercles as to impede the flow of water, and to remove them it was found necessary to cut into the pipe from one-half to one-third its thickness. The steel portions, put in at the same time, were found to be clean and bright as new. The tubercles referred to are spongy growths, continually forming in iron pipe. Bids for both iron and steel pipe will probably be asked.
